One team for development, deployment, and support.

30+
systems delivered

20+
specialists

2021
building since

When to talk to CKT Labs

Document and workflow automation, digital products, fintech integrations, machine learning, and security.

Selected delivered projects

Invoicer — -80%
manual invoice processing time
AI-assisted extraction, validation, and 1C integration.

Phisher — 400+
phishing simulation templates
Staff training, campaign management, analytics, and reports.

Finder — Live
booking and customer support
Real-time table availability and an ML-powered chatbot.

How delivery works

Discovery and NDA / agreed scope / weekly demos / deployment.

Your team receives source code and handover documentation.
Post-launch support is agreed separately.

Figures refer to the named case studies. Source: cktlabs.ru.

Tell us what needs to change.

Free initial scoping conversation. Response within 48 hours.
